Subject: Road Repair and Repaving in Steamburg Estates

Dear Chris:

We can't begin to express our gratitude to you and your team for the work and resolution of the premature failure of road surfaces and curbs in the Steamburg South subdivision. Each year at our annual meeting the roads would be a topic of discussion, and we would assure our neighbors that the homes they secured in this lovely section of East Leroy Township were wise investments. We meet tonight for our 18th annual Association meeting, and it's a joy to anticipate the discussion regarding roads and continued home valuations because of the work that has been done.

We saw the intense labor that went into the power wash/sand blasting of old road residue off curbs and gutters, and it was *very* successful and *much* appreciated. We understand that there are still plans to repair and patch some areas and provide additional lawn restoration if this has not already been done. This is just how we envisioned our subdivision when we moved here!

Thanks for keeping the promises that were made to our residents on having a place where we could walk freely and engage with each other. We know that this job was no small undertaking and many people worked to make it happen. You and your team are to be commended for the tenacity taken to do this work. We also wish to thank East Leroy Township, the Board of Commissioners, Chairman Derek King, and County Administrator/Controller Kelli Scott for their support of this project.

With sincere appreciation,

STEAMBURG SOUTH HOMEOWNERS ASSOCIATION BOARD
